- chennai,poonamallee

SKILLS

Technical Skills:

- C,C++,Python.
- HTML,CSS,JS.
- Embedded Systems (ESP32, Arduino)
- IoT and Sensor Integration
- freecad(CAD Design)
- KiCad(PCB Design)
- Firebase (Realtime DB, Cloud Integration)
- AI powered web Development
- VLSI (Basic)
- Digital Electronics and analog

Fundamentals

PROJECTS

Smart IV Drip Monitoring System

- Developed a system to monitor IV fluid level using sensors
- Implemented alert mechanism for low fluid condition

Smart Air Quality Monitoring System

- Built system to detect air pollutants using MQ sensors
- Enabled real-time monitoring using IoT

ECG-Based Authentication System

- Designed system to identify users based on ECG signals
- Applied basic signal processing concepts

ACHIEVEMENTS

- Winner – International Protothon
- Winner – Hackathon
- Best Capstone Project Award

PROFILE

Creative and highly motivated Electronics and Communication Engineering student with a strong interest in Embedded Systems, IoT, and VLSI. Known for innovative thinking and problem-solving ability, with hands-on experience in developing real-time sensor-based projects and participating in international hackathons. Possesses foundational skills in C, C++, and Python, along with knowledge of digital electronics and SoC concepts. Currently seeking internship opportunities to apply technical skills, gain industry experience, and contribute to impactful engineering solutions.

WORK EXPERIENCE

Maven Silicon 2025

- Designed and implemented RTL for AHB-to- APB bridge using Verilog
- Gained hands-on experience in AMBA bus architecture and SoC design concepts
- Performed RTL verification and debugging to ensure functional correctness
- Applied digital electronics and VLSI design principles in real-time projects
- Collaborated with team members to develop and present technical solutions effectively

IoT Developer

- Developed IoT-based systems using sensors to collect and process real-time environmental data
- Integrated ESP32 with Firebase for real-time data storage and cloud communication
- Designed a basic web dashboard to monitor sensor data remotely

EDUCATION

Saveetha School of Engineering

B.Tech in Electronics and Communication
Engineering, 2024-2028

- Demonstrated innovation and problem-solving skills by winning an international-level Protothon/Hackathon
- Actively contributed as an IEEE member and coordinated multiple technical events
